HTA Health Economics and BIA Analyst

PDCI is seeking an analyst with HTA experience and excellent analytical and computational skills to contribute to the health economics and budget impact analysis components of reimbursement submissions to HTA agencies and provincial, federal and private drug plans. PDCI prepares these submissions on behalf of our pharmaceutical / biotechnology clients.

Role & Qualifications

- 2+ years experience in health technology assessment working at an (HTA) agency (e.g., CADTH, INESSS), government (provincial drug plans, PMPRB), or consulting to pharma / biotech organizations.
- 2+ years of proven experience preparing budget impact analyses and contributing to the development or adaptation of health economic models prepared for submission to CADTH (CDR, pCODR), INESSS, public or private drug plans. Advanced computational skills are essential - an advanced degree in a relevant discipline is an asset.
- Superior communication skills and a strong ability to learn and convey technical, scientific information is essential for success in this role.
- The ideal candidate will be familiar with the CADTH/INESSS health economic guidelines as well as the budget impact analysis requirements for provincial and federal drug benefit programs in Canada.
- This is an Ottawa-based position however PDCI may be willing to consider a field-based employee, with occasional travel to Ottawa when necessary.
- Fluency in English is essential for the position with fluency in French an asset, but not essential.

Applying

Interested candidates should submit a detailed resume / curriculum vitae to careers@pdci.ca referencing the job title. **The resume (and/or a cover letter) should clearly indicate how the candidate meets the qualifications outlined above.** We thank all candidates for applying. Only those selected for further consideration will be contacted.
